BS, Business Management (pending)

Bellevue University, Bellevue, NE

INTRODUCTION:

Spent 2+ years developing the skills to increase velocity, reliability and quality for SDLC. Experience with Python, AWS, Docker, Kubernetes & Jenkins, getting ready to help organizations instill DevOps for the modern age to save time and money through automation.

PERSONAL / SCHOOL EXPERIENCE:

- Installed and configured Jenkins, Maven, Docker, Kubernetes and Ansible
- Configured and provisioned different ports for Jenkins and Tomcat servers
- Created Snapshot, Images (AMI), implemented Load Balancing and Auto Scaling
- Maintained Git workflow for version control (SCM)
- Built CI/CD Pipeline for code deployment using Jenkins
- Created Docker image, stored in Docker hub and deployed to Kubernetes
- Built and deployed Docker containers for implementing microservices
- Wrote scripts in YAML to automate systems updates
- Created IAM, Security groups features on AWS
- Build and deployed portfolio app using python and Flask web framework
- Created a full stack java project tracker application

WORK EXPERIENCE:

One Stops Creates LLC - **Project Manager (Contract)** - 04/2019 – 07/2019

- Gathered, analyzed client requirements, and recommended services/products.

Contemporary Analysis LLC - **Data Scientist (Contract)** - 10/2017 - 06/2018
